Just joined the forum, I was in my youth a keen collector (before it became illegal) I had a small but varied collection of tropical butterflies and moths as I lived in the Far East at the time. My prize specimen was a Rajah Brook bird wing. Unfortunately, ants attacked the whole collection and it had to be destroyed.

I have always enjoyed the pleasure of country walking and try to have a camera with me to take photos of what I see as I roam with my wife.
