

## Serhiy Popoff

by serhiy popoff, 21-Feb-11 02:48 PM GMT

This is a short an illustrated message how I set up muntain butterfly recording camp in our Ukrainin Carpathians at 18 February 2011

I would like to start five butterfly recording transects, one km long each accordingly to Pollard's walks approach.

It is on from the transects

March 16, 2011 First butterflies on wings now, *Gonepteryx rhamni*, 2 males and female, one male *Polygonia c-album* feeding on dog manure registered. The air temperature was 15°C in shadow, sunny weather and warm spring in village next to my building. Seen also one moth species *Gonospileia glyphica* with day activity in mass.

Butterflies and animals fixed with mobile phone camera March, 16 2011

*Polygonia c-album* male

### Re: Serhiy Popoff

by Mikhail, 17-Mar-11 06:00 PM GMT

Hi Serhiy.

I think your moth is actually *Archiearis parthenias*, a day active species (*Geometridae*) that feeds as a larva on Birch (*Betula pendula*).

Misha

April finished soon.

Some impressive pictures on my mountain land done.

My cat Milka is very happy amongst of *Anemone nemorosa* flowers in spring apple garden

A few days ago new transect was created there. Bukovcevo-6 looks like directly at <http://www.gpsies.com/map.do?fileId=dtfxgzisclknbnjm>

Beautiful *Nymphalis antiopa* on transect Bukovcevo-1 section No1 relax on sun
